

NEXUS/HARTFORD: A CONSORTIUM MODEL TO EXPAND GERONTOLOGY EDUCATION & RESEARCH

Pauline Komnenich, PhD, RN
College of Nursing and Health Innovation
Arizona State University

Purpose/Aims

- Create a united front for doctoral education.
- Meet budgetary constraints through collaboration.
- Expand the impact of two initiatives on nursing education, research, scholarship and practice.

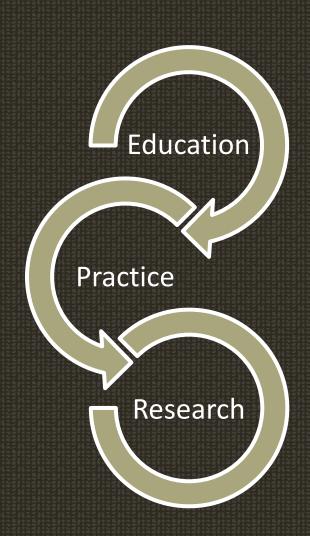

Background

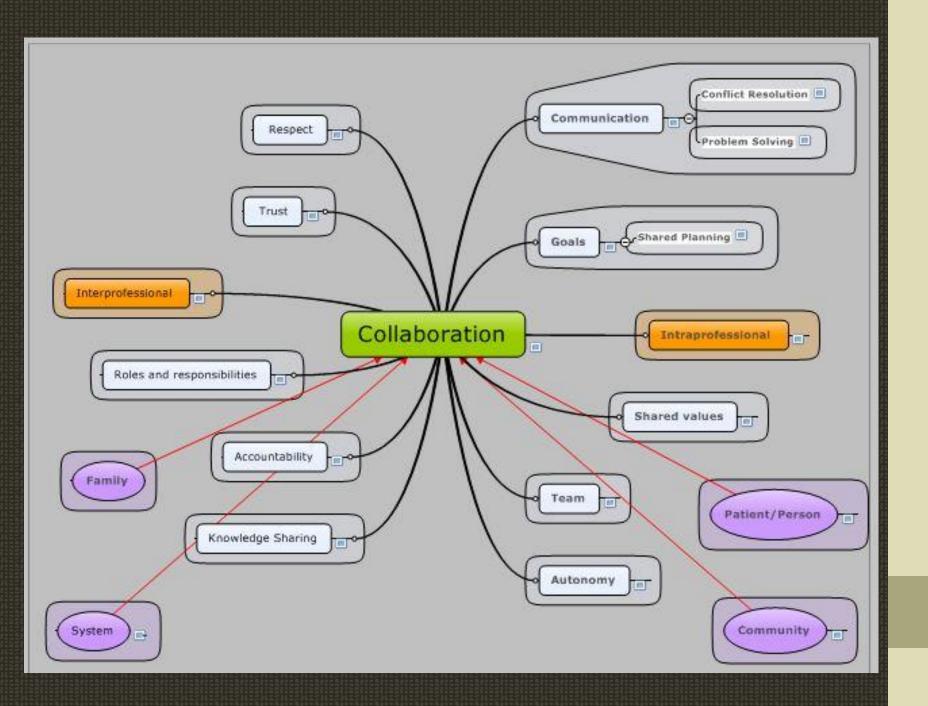

Rationale for NEXus consortium arrangements

- Provide a way to increase equity and access of faculty, students and institutions to educational programs in nursing.
- Promote a pathway to establish research partnerships.
- Operate on a concept of collaboration.

Collaboration

Benefits

- Potential for equitable participation in environments competing for resources
- Access for students and faculty to available resources, educational programs and research
- Potential for collaborative research and scholarly projects
- Capacity to insure equity and access in doctoral education in nursing
- Continued sustainability
- Assistance in meeting institutional budgetary constraints

Challenges

- Funding from agencies and institutions
- Complexity of consortium arrangements
- Sustainability of collaborative arrangements

Success of NEXus

- Operating Principles
 - clear memoranda of agreement
 - participating institutions commitment to education and research, scholarship and practice
 - identified core values such as mutual trust and respect among colleagues
 - attention to sustainability
- Track record

Attraction for National Initiatives such as the National Hartford Centers

- Expand course offerings
- Increase research and scholarship potential for participating institutions
- Increase institutional collaboration of public and private universities
- Contribute to the mission of NHGNE Centers to enhance and sustain academic capacity to prepare nurses to provide quality care for older adults.
